

Complete **Coverage**: Use the wipe in an "S" shape and clean from top to bottom and from cleanest to dirtiest.

If your wipe starts to dry out - take a new wipe

Maximum **contact**:
Keep wipes flat.
Maximising contact between wipe and surface means more of the wiper's chemistry can be transferred

Time is precious and Medipal is here to **provide solutions for infection prevention in under a minute**. We support your patients, staff, and healthcare environment with the Medipal Minute.

medipalminute

The 3 critical Cs helps you to achieve effective disinfection and prevents cross contamination.

- 1 Complete Coverage
- 2 Maximum Contact
- 3 Let the Chemistry work
