## continence care wipes

Skin friendly pH  
Alcohol free

Fully recyclable packaging  
Fragrance free

Daily continence care  
Cleansing & moisturising

### Products in this range:

#### 30 Continence Care Wipes, Flow Wrap

<b>Packs per case:</b>	20
<b>Product Code:</b>	S555110MP

### Materials:

Spunlace material is made by mechanically entangling fibres through the application of high pressure water jets. This gives the material a thick, soft and strong feel. The apertured texture gives the wipes a high liquid capacity which makes them suitable for wiping larger surfaces and the drape of the material gives a 'cloth-like' feel

### Technical details:

Medipal Continence Care Wipes have been developed with the ideal blend of non-woven materials. Designed to offer effective cleaning whilst delivering a gentle, moisturised feel. These products have been dermatologically tested.

### Chemical formulation:

Medipal Continence Care Wipes solution is designed by our in house experts who have carefully blended friendly skin moisturisers in combination with 3% Dimethicone which help keep skin clean, moisturised and fresh. The formulation is maintained at a skin balanced pH and is dermatologically tested. Studies have shown perineal care washcloth containing dimethicone to provide enhanced outcomes for patients with incontinence contact dermatitis (ICD), compared with standard of care.\*

## Cleanse, moisturise & protect – all in one

Medipal Continence Care Wipes are specially formulated to support skin health by providing gentle yet effective cleansing. Infused with **3% Dimethicone\***, these wipes create a protective barrier against urine and faeces, helping to maintain skin integrity and reduce irritation.

- ✓ **Cleanses** the skin thoroughly
- ✓ **Moisturises** to prevent dryness
- ✓ **Protects** with a barrier against irritants

## How to use

### Step 1

Pay particular attention to the elderly, children and patients with sensitive skin. Follow your standard moving and handling techniques when providing continence care. Do NOT USE on broken skin or wounds.

### Step 2

Use Medipal Continence Care Wipes one at a time to remove soiling, use additional wipes for cleansing and providing protection against moisture caused by urine and faeces.

### Step 3

There is no need to rinse, just allow the patients skin to air dry.

### Step 4

Discard used wipes in the appropriate waste bin following your local guidelines.
