Gentle Cleansing, Hydrating & Eco-Friendly

Medipal Maceratable Skin Cleansing Wash Cloths are enriched with Vitamins B5 and E, Aloe Vera, and added moisturisers. Dermatologically tested for total peace of mind, these wipes are perfect for deodorising, cleansing, and refreshing patient skin. Free from lanolin and parabens, they are alcohol-free and have a skin-friendly pH.

- ✓ **Cleansing, Deodorising & Refreshing** – Ideal for daily use on skin
- ✓ **Hydrating & Moisturising** – Helps maintain skin moisture levels
- ✓ **Part of Patient Hand Hygiene Strategy** – Suitable for healthcare settings

Products in this range

**50 Maceratable Skin
Cleansing Cloth,
Flow Wrap**

Packs per case: 20

Product Code: S600110MP

Chemical formulation:

Medipal Skin Cleansing solution is designed by our in house experts who have carefully blended gentle skin friendly cleansers in combination with vitamin B5 and vitamin E which help keep skin clean, fresh and nourished. The formulation is maintained at a skin balanced pH and is dermatologically tested.

Materials:

Spunlace material is made by mechanically entangling fibres through the application of high pressure water jets. This gives the material a thick, soft and strong feel. The apertured texture gives the wipes a high liquid capacity which makes them suitable for wiping larger surfaces and the drape of the material gives a 'cloth-like' feel.

How to use

Step 1

Before you start

Pay particular attention to the elderly, children and patients with sensitive skin. Select your Medipal Patient Care Product. Use a fresh wipe for each step. Follow your standard moving and handling techniques when bed bathing patients. Do not use on wounds or broken skin.

Step 2

8 step bed bathing technique

1. Head & Neck

Use the wipe on face, paying particular attention to nose, ears and neck but avoid eyes.

2. Arm and armpit

Starting from upper shoulder, clean down first arm and hand. Pay particular attention to areas between the fingers, elbow joint, and any skin folds. Clean under armpit.

3. Arm and armpit

Starting from upper shoulder, clean down first arm and hand. Pay particular attention to areas between the fingers, elbow joint, and any skin folds. Clean under armpit.

4. Leg and foot

Starting from hip joint, clean down first leg to the foot and sole. Pay particular attention to areas between the toes, knee joint and any skin folds.

5. Leg and foot

Starting from hip joint, clean down first leg to the foot and sole. Pay particular attention to areas between the toes, knee joint and any skin folds.

6. Chest and abdomen

Clean the chest being careful with the sensitive areas.

7. Back and lower back

Clean the back and lower back.

8. Groin and pubic area

Wash the groin and perennal area following your standard nursing practice.

Step 3

After care

There is no need to rinse, just allow the patients skin to air dry.

Step 4

Disposal

Discard used wipes in the appropriate waste bin following your local guidelines.
