Alcohol Surface Disinfectant Wipes

3 products in this range

Fast acting, effective disinfection.

- Broad-spectrum efficacy - helping you maintain your environment with confidence
- Each wipe disinfects quickly without leaving visible residue
- Ethanol-based formula, perfect choice for water-sensitive areas

Alcohol Surface Disinfectant Wipes

Key Highlights

- For use disinfecting food areas
- Quat & PHMB Free
- Ethanol based solution
- Suitable for use within dry food processing and manufacturing
- Blue, visually detectable wipe material
- 2l canister - 27% plastic reduction compared with previous version
- Tritex material, canister, buckets, lids, and labels are fully recyclable
- Cardboard used in outer packaging is FSC approved

How to use

1

Risk assessment

Please follow your agreed risk assessment policy guidelines regarding the use of PPE.

4

S-shaped motion

Wipe in an S-shaped motion from clean to dirty, applying even pressure with the wipe flat.

Do not rewipe the same area.

Discard the wipe if it becomes soiled or dry, and take a new one from the pack.

2

Wipe selection

Ensure the wipes are still within the expiry date before use.

Close the pack after selecting your wipes to prevent contamination.

5

Discard waste

Discard used wipes in the designated waste bin, following your local guidelines.

3

Compatibility

Ensure you use the correct wipe for the surface or equipment, following protocols and compatibility guidelines.

6

Air dry

Make sure the surface stays wet for the required contact time as per the packaging instructions.

Ensure the surface is fully dry before use.

Technical details

Chemical Formulation

Paltx Alcohol Surface Disinfectant Wipes contain ethanol as their active ingredient.

Our ethanol-water blended solution is optimal for disinfection because the added water slows evaporation, increases surface contact time, and helps the alcohol penetrate microbial cell membranes.

Ethanol has a wide range of efficacy.

Substrate*

Pal's proprietary Tritex® material is made by bonding layers of spunbond and meltblown polypropylene fibres together in a high heat process.

The addition of a hydrophilic coating means optimum and consistent liquid discharge.

Tritex® is 100% synthetic.

*Excludes S76230TX

Substrate key features

High Strength

Excellent solution retention

Very low linting

Efficient solution release

Efficacy details

Standard	Organism Group	Organism(s)	Contact Time	Conditions
EN 1276	Bactericidal	<i>Pseudomonas aeruginosa</i> <i>Staphylococcus aureus</i> <i>Enterococcus hirae</i> <i>Escherichia coli</i>	1 minute	Dirty
EN 1276	Bactericidal	<i>Pseudomonas aeruginosa</i> <i>Staphylococcus aureus</i> <i>Enterococcus hirae</i> <i>Escherichia coli</i>	1 minute	Clean
EN 13727	Bactericidal	<i>Pseudomonas aeruginosa</i> <i>Staphylococcus aureus</i> <i>Enterococcus hirae</i>	1 minute	Clean
